

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF BROADLEAF WEEDS IN SNOW PEAS AND SUGAR
SNAP PEAS**

PERMIT NUMBER – PER10976

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 10 AUGUST 2009 TO 31 MARCH 2030

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 7, 141 Walker Street
NORTH SYDNEY NSW 2060

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

BASAGRAN POST-EMERGENCE HERBICIDE (APVMA No. 31608).

PLUS OTHER REGISTERED PRODUCTS

Containing: 480 g/L BENTAZONE as the only active constituent.

Restraints:

DO NOT apply under hot, dry conditions.

Spray drift restraints:

Specific definitions for terms used in this section can be found at apvma.gov.au/spraydrift.

DO NOT allow bystanders to come into contact with the spray cloud.

DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift. Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.

DO NOT apply unless the wind speed is between 3 and 20 kilometres per hour at the application site during the time of application.

DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings 1 to 2 hours before sunset and persist until 1 to 2 hours after sunrise.

Directions for Use:

Crop	Target Weeds	Rate
SNOW PEAS SUGAR SNAP PEAS	Broadleaf Weeds As listed on the approved label for beans	1 - 3 L product / ha Applied as split applications: refer to critical use comments

Critical Use Comments:

- **DO NOT** apply more than two (2) applications per crop
- **DO NOT** exceed a total cumulative volume of 3 L product per hectare per crop.
- Apply the first application at the 2-3 node stage of the crop at a rate of 1-1.5 L/ha.
- Apply a second application (if needed) after the 5-node stage of the crop at a rate of 1.5-2 L/ha.
- Allow a minimum of 3 weeks between applications
- Avoid applications during cold, frosty or drought conditions. Refer to the section titled "*The Effects of Stress and Weather*" on the product label for further information before applying the product.

Withholding Period:

Harvest: Do not harvest for 4 weeks after application.

Grazing: **DO NOT** graze or cut for stock food.

Jurisdiction:

All States and Territories except Vic.

Note: Victoria is not included in this permit, as their *Control-of-Use* legislation means a permit is not required to legalise this off-label use in that state.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the Agricultural and Veterinary Chemicals Code Act 1994, in accordance with the obligation imposed by that section.

To Avoid Crop Damage

The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.

Export of treated produce

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human consumption. A TMRL has been established for BENTAZONE in PODDED PEA (YOUNG PODS) [SNOW AND SUGAR SNAP]. MRLs can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 22/01/2015 - Permit extended to expire on 31st March 2020. Permit version 2.

09/02/2018 - Permit amended to update holder details. Permit issued as version 3.

18/02/2020 - Permit expiry extended to 31 March 2025. Permit issued as version 4.

28/03/2025 – Export of treated produce statement added. Spray drift restraints added. Permit expiry extended to 31 March 2030. Permit issued as version 5.
