

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF GREY MOULD IN CUCUBERS**

PERMIT NUMBER – PER14046

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 1 MAY 2013 TO 31 JANUARY 2028

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 7, 141 Walker Street
NORTH SYDNEY NSW 2060

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

DITHANE RAINSHIELD NEO TEC FUNGICIDE (APVMA No. 59688)
PLUS OTHER REGISTERED PRODUCTS
Containing: 750 g/kg MANCOZEB as the only active constituent.

Directions for Use:

Crop	Disease	Rate
Cucumber (Field and protected)	Grey Mould (<i>Botrytis cinerea</i>)	1.7 – 2.2 kg/ha OR 150 – 200 g/100L up to a maximum of 2.2 kg/ha

Critical Use Comments:

- Apply in sufficient water to cover the crop to the point of run-off. Thorough coverage of the treated area is essential.
- Apply by ground boom sprayer, backpack sprayer, or equivalent equipment.
- Apply with a re-treatment interval of 7-10 days.
- DO NOT apply more than 8 applications per crop.
- DO NOT apply less than 7 days after the previous treatment.
- For improved coverage and spray retention, add a surfactant according to label instructions.

Withholding Period:

Harvest: Do not harvest for 7 days after application.

Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

Export of treated produce

Maximum Residue Limits (MRLs) have been established to allow treated produce to be used for human consumption. An MRL has been established for DITHIOCARBAMATES in FRUITING VEGETABLES, CUCURBITS. MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: Permit amended to extend expiry date until 31 March 2023. Permit version issued 13 December 2017.

05/01/2023 – Permit updated to include additional critical use comments, clarify use situations and rates, and update permit format and additional conditions to current standard. S161 statement added. Permit expiry extended to 31/01/2028. Permit issued as Version 3.
