Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF REDLEGGED EARTH MITE IN CHICORY AND
ONION THRIPS IN SELECTED ALLIUM CROPS**

PERMIT NUMBER – PER14457

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 19 MARCH 2014 TO 31 MARCH 2029

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LIMITED
Level 7, 141 Walker Street
NORTH SYDNEY NSW 2060

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

DOMINEX DUO INSECTICIDE (APVMA No. 53487)

PLUS OTHER REGISTERED PRODUCTS

Containing: 100 g/L ALPHA-CYPERMETHRIN as the only active constituent.

RESTRAINTS:

DO NOT apply using aerial application methods.

DO NOT apply if rainfall is expected within 6 hours of spray application.

DO NOT spray any plants in flower while bees are foraging.

Directions for Use:

Crop	Pest	Rate
Chicory	Redlegged earth mite (<i>Halotydeus destructor</i>)	Post sowing, pre-emergence: 100 mL/ha OR Post seedling emergence: 50 mL/ha
Leeks Shallots Spring onions	Onion thrips (<i>Thrips tabaci</i>)	130 mL/ha

Critical Use Comments:

Redlegged earth mite:

- DO NOT apply more than 3 applications per crop.
- DO NOT apply less than 7 days after the previous treatment.
- Refer to 'Resistance warning' on product label for information on resistance management.

Onion thrips:

- Apply as per appropriate regional/state pest thresholds.
- DO NOT apply more than 3 applications per crop.
- DO NOT apply less than 7 days after the previous treatment.
- Refer to 'Resistance warning' on product label for information on resistance management.

Withholding Period:

Harvest: Do not harvest for 7 days after application.

Grazing: Do not use on chicory crops grown for stock feed.

Jurisdiction:

All States and Territories.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the Agricultural and Veterinary Chemicals Code Act 1994, in accordance with the obligation imposed by that section.

To Avoid Crop Damage

The sensitivity of all species and varieties of crops to be treated with alpha-cypermethrin under this permit has not been fully evaluated under all growing conditions. It is advisable to only treat a small area of the crop and closely monitor plant health. Discontinue applications when any adverse symptoms are observed.

Export of treated produce

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human consumption. MRLs can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 1 May 2018; Permit amended to update holder details. Permit version 2 issued.

4 April 2019; Permit expiry date extended to 30 June 2024. Reference to protection of bees and resistance management warning from the product label added to permit. Permit issued as version 3.

14/03/2024 – Permit amended to include s161 statement and update export of treated produce statement. Permit expiry extended to 31 March 2029. Permit issued as version 4.
