

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL PRODUCT  
FOR CONTROL OF ALLIGATOR WEED IN DOMESTIC GARDEN SITUATIONS**

**PERMIT NUMBER - PER14733**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 1 JULY 2014 TO 30 JUNE 2024.**

**Permit Holder:**

NSW DEPARTMENT OF PRIMARY INDUSTRIES  
161 KITE STREET  
ORANGE NSW 2800

**Persons who can use the product under this permit:**

Persons trained or experienced in the preparation and use of agricultural chemicals.

## CONDITIONS OF USE

### Product to be used:

ROUNDUP BIACTIVE HERBICIDE (APVMA No. 48518)

PLUS OTHER REGISTERED PRODUCTS

Containing: 360 g/L GLYPHOSATE PRESENT AS THE ISOPROPYLAMINE SALT as the only active constituent.

CASORON 4G HERBICIDE (APVMA No. 69139)

PLUS OTHER REGISTERED PRODUCTS

Containing: 40 g/kg DICHLOBENIL as the only active constituent.

BRUSH-OFF BRUSH CONTROLLER (APVMA No. 46401)

PLUS OTHER REGISTERED PRODUCTS

Containing: 600 g/kg METSULFURON METHYL as the only active constituent.

### Directions for Use:

Situation	Pest	Rate
Home gardens in residential areas (Urban backyards)	Alligator Weed ( <i>Alternanthera philoxeroides</i> )	<b>Glyphosate:</b> 10 mL product / 1 L water  <b>Dichlobenil:</b> 43 – 63 g product / square metre  <b>Metsulfuron-methyl:</b> 1 g product / 10 L water

### Critical Use Comments:

- ONLY use glyphosate herbicides that are approved for use in aquatic areas.
- DO NOT use metsulfuron methyl or dichlobenil when replanting of treated areas is required. When replanting is required, use glyphosate only.
- Avoid soil contamination that may lead to surface or ground water contamination. Users must comply with the NSW *Protection of the Environment Operations Act 1997*.
- DO NOT apply from equipment or under conditions that could cause product to come into contact with nearby susceptible plants/crops. Refer to warning on product labels.
- Persons using product under this permit MUST notify property owners (or occupiers) as follows:
  - a) Notification of any product application that occurs on their property under this permit.
  - b) Notification that the treated weed is not to be used for any purpose after product application has occurred.
  - c) Notification that metsulfuron-methyl and dichlobenil are soil residual products therefore plant back restrictions apply.

#### *Glyphosate & Metsulfuron methyl:*

- DO NOT apply to weeds that are not actively growing.
- Use coarse spray droplets from low pressure hand application equipment only. Avoid atomisation due to high pressure.
- Wet leaf area of Alligator weed only.
- Avoid run-off to soil.

#### *Dichlobenil:*

- Treatment should be carried out when plants are dormant - usually in the colder months.

- Use the higher rate for heavier weed infestations.

**Withholding Period:**

NOT required when used as directed.

**Jurisdiction:**

NSW only.

**Additional Conditions:**

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

Issued by Australian Pesticides and Veterinary Medicines Authority

Note: 14/06/2019: Expiry date extended to 30 June 2024. Critical use comments updated to improve clarity.

Reference to label statements added. Permit issued as version 3.

12/01/2017: Name change of product and application rates according to manufacturer's changes. Permit issued as version 2.
