**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF VARIOUS GRASS AND BROADLEAF WEEDS IN LEEKS,
SHALLOTS AND SPRING ONIONS**

PERMIT NUMBER – PER14742

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 1 JULY 2014 TO 28 FEBRUARY 2029

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 7, 141 Walker Street
NORTH SYDNEY NSW 2060

Persons who can use the product under this permit:

Persons generally

CONDITIONS OF USE

Products to be used:

TRIBUNIL SELECTIVE HERBICIDE (APVMA No. 31780)

PLUS OTHER REGISTERED PRODUCTS

Containing 700 g/kg METHABENZTHIAZURON as the only active constituent.

RESTRAINTS:

SPRAY DRIFT RESTRAINTS

Specific definitions for terms used in these conditions can be found at

Apvma.gov.au/spraydrift

- DO NOT allow bystanders to come into contact with the spray cloud.
- DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift. Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.
- DO NOT apply unless the wind speed is between 3 and 20 kilometres per hour at the application site during the time of application.
- DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings one to two hours before sunset and persist until one or two hours after sunrise.

Directions for Use:

Crop	Pest	Rate
Leeks	Broadleaf weeds as listed on the product label.	1 – 3 kg product / ha
Spring onions Shallots	Various broadleaf and grass weeds, as listed on the product label.	3 kg product / ha

Critical Use Comments:

- Apply one (1) foliar spray application only per crop using calibrated boom spray, or similar ground based equipment.
- Apply in accordance with the directions for use and precautions as stated in the product label for onions.
- Apply when the crops have one or more true leaves.
- Apply in sufficient water to ensure complete and thorough coverage of foliage and crop.
- DO NOT use more than 2 kg product/ha when temperatures exceed 27°C.
- DO NOT add any other pesticide or wetting agent to the product for use under this permit.
- Do not apply under weather conditions or from spraying equipment that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures.

Withholding Period:

Harvest: Do not harvest for 7 weeks after application.

Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

Export of treated produce

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human consumption. TMRLs have been established for METHABENZTHIAZURON in LEEKS, SHALLOTS AND SPRING ONIONS. MRLs can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 12/02/2024 – Permit updated to include general spray drift restraints, update MRL standard reference, and add s161 condition. Permit expiry extended to 28/02/2029. Permit issued as Version 5.
