OFF-LABEL PERMIT (OLP)
FOR USE OF A REGISTERED AGVET CHEMICAL PRODUCT

PERMIT NUMBER - PER4590

This permit is issued under the Agvet Code, of the relevant jurisdictions, to the person stated above. The holder of the permit must comply with all requirements as specified in the Agvet Code. A summary of the key requirements are that the holder must:

- supply any requested information to the NRA;
- inform the NRA if they become aware of any relevant information concerning the uses dealt with by this permit; and
- comply with a lawful direction or requirement of an inspector.

This permit for the reason given below, allows any person listed in **1. Persons** to use the products listed in **2. Products** for the minor off-label use specified in **3. Directions for Use** in the jurisdictions listed in **4. States**.

If this permit were not issued use of the products as specified in this permit would constitute an offence under the Agvet Codes.

The persons listed in **1. Persons** must comply with all conditions listed in **CONDITIONS OF PERMIT** to be effectively covered by this permit.

THIS PERMIT IS IN FORCE FROM 17 FEBRUARY 2003 TO 31 DECEMBER 2010.
It is in force until it expires or it is cancelled, suspended or surrendered.

Reason for issue of permit:

The Agriculture Protection Board of Western Australia lists a wide variety of Declared Plants that require specified control under the *Agriculture and Related Resources Protection Act 1976*. This permit is issued to allow the off label use of certain registered herbicides identified by the Department of Agriculture WA as being effective when used as recommended, to allow landholders to carry out their obligations in controlling Declared Plants. The permit is required to allow landholders to use registered herbicides up to the maximum registered rate in currently approved crop or pasture situations in WA or to apply at a spot spraying rate that is currently permitted under permits for non agricultural situations. Declared Plant species are not, because of their minor importance as far as commercial sales of the herbicide are concerned included on the approved labels for available products.
