

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT
FOR FIELD CROP DESSICATION OF MUNG BEANS**

PERMIT NUMBER - 81558

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 2 MARCH 2016 TO 31 MARCH 2019.

Permit Holder:

PULSE AUSTRALIA
LEVEL 10, FARRAR HOUSE 24-28 COLLINS ST
MELBOURNE VIC 3000

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

DUPONT ALLY HERBICIDE

PLUS OTHER REGISTERED PRODUCTS

Containing: 600 g/kg METSULFURON-METHYL as their only active constituent.

Directions for Use:

Crop	Situation	Rate
Mung beans	Field crop desiccation	5 g/ha when applied with glyphosate at label rates. <u>Spray volume:</u> Ground: 80 L/ha Aerial: 20 L/ha

Critical Use Comments:

- Apply to mature crops when pods are brown/black.
- DO NOT make more than 1 foliar application per crop using boomspray or aircraft.
- DO NOT apply treatments with spraying equipment or under weather conditions which are likely to cause spray drift onto nearby susceptible crops, pastures or other sensitive plants.

Withholding Period:

Harvest: DO NOT harvest for 7 days after application.

Grazing: DO NOT graze or cut for stockfood for 7 days after application.

Jurisdiction:

ALL STATES except VIC.

Note: Victoria is not included in this permit as their *Control-of-Use* legislation means that an APVMA permit is not required to legalise this off-label use in that state.

Additional Conditions:

This Permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

Export of treated produce

Use of metsulfuron-methyl may result in detectable residues in mung beans and not all countries have established tolerances for metsulfuron-methyl in mung beans. If treated produce is to be exported due account should therefore be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements.

The relevant industry groups should be required to demonstrate how they intend to manage the associated risk following publication of the Trade Advice Notice.

Issued by the Australian Pesticides and Veterinary Medicines Authority
