- Apply at the commencement of flowering when 10% of plants have open flowers.
- Apply in a spray volume ranging from 200 – 400 L water /ha.

Withholding Period:

Harvest: DO NOT harvest for 7 WEEKS after application.

Grazing: DO NOT graze or cut for livestock feed for 7 WEEKS after application.

Jurisdiction:

WA only.

Additional Conditions:

This PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

PERSONS who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the DETAILS and CONDITIONS of this permit.

Export of treated produce:

To allow treated produce to be supplied or otherwise made available for human consumption the APVMA has established a Maximum Residue Limit (MRL) at *0.1 mg/kg for Lupin (dry). In addition, a TMRL for Iprodione in Lupin forage and fodder (dry) of T10 mg/kg has been established to cover animal feed commodities. These MRL limits apply only to produce marketed and consumed in Australia. If treated produce is to be exported due account should be therefore taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements of the importing country.
