

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT
FOR THE CONTROL OF RED SHOULDER LEAF BEETLE IN MUNGBEANS**

PERMIT NUMBER – PER83624

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 9 DECEMBER 2016 TO 31 MARCH 2019.

Permit Holder:

PULSE AUSTRALIA LIMITED
Level 10 Farrer House,
24–28 Collins St
Melbourne, VIC 3000

Persons who can use the product under this permit:

Persons generally

CONDITIONS OF USE

Product to be used:

DUPONT STEWARD EC INSECTICIDE

Containing: 150 g/L INDOXACARB as the only active constituent.

Directions for Use:

Crop	Pest	Rate
Mungbeans	Red Shoulder Leaf Beetle or Monolepta Beetle (<i>Monolepta australis</i>)	200 mL/ha

Critical Use Comments:

- Apply by aerial application or by ground rig. Apply according to DuPont Steward Insecticide label, ensuring all spray drift management instructions are followed.
- DO NOT apply more than 1 application per field for the crops entire growth cycle.
- Target adult beetles when they reach the economic spray threshold. Ensure thorough spray coverage.
- DO NOT apply by ultra low volume methods.

Withholding Period:

Harvest : DO NOT harvest for 21 days after application.

Grazing: DO NOT graze treated crops or cut for stock food for 21 days after application.

LIVESTOCK DESTINED FOR EXPORT MARKETS

The grazing withholding period only applies to stock slaughtered for the domestic market. Some export markets apply different standards. To meet these standards, ensure that in addition to complying with the grazing withholding period, that the Eport Slaughter Interval is observed before stock are sold or slaughtered.

EXPORT SLAUGHTER INTERVAL – 4 weeks: After observing the grazing withholding period, livestock that has been grazed on or fed treated linseed or safflower forage/hay/stubble should be placed on clean feed for 4 weeks prior to slaughter.

Jurisdiction:

QLD only.

Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.
