

**PERMIT TO ALLOW EMERGENCY USE  
OF A REGISTERED AGVET CHEMICAL PRODUCT**

**FOR THE CONTROL OF BOTRYTIS IN CHICKPEAS AND LENTILS**

**PERMIT NUMBER - PER84408**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 2 JUNE 2017 TO 30 NOVEMBER 2017.**

**Permit Holder:**

PULSE AUSTRALIA LIMITED  
LEVEL 10 FARRER HOUSE  
24-28 COLLINS ST  
MELBOURNE VIC 3000

**Persons who can use the product under this permit:**

Persons generally.

## CONDITIONS OF USE

### Product to be used:

FILAN FUNGICIDE

PLUS OTHER REGISTERED PRODUCTS

Containing: 500 g/kg BOSCALID as their only active constituent.

### Directions for Use:

Crop	Purpose	Rate
Chickpeas and Lentils	Botrytis grey mould ( <i>Botrytis spp.</i> )	1.2 kg/ha

### Critical Use Comments:

- DO NOT apply more than 2 foliar applications per crop with a minimum re-treatment interval of 7-14 days.
- Apply the first application at the beginning of flowering.
- Apply in a minimum water volume of 100 L/ha by ground; 30 L/ha by air.

### Withholding Period:

Harvest: DO NOT harvest for 21 days after application.

Grazing: DO NOT graze or cut for stock food for 21 days after application.

### LIVESTOCK DESTINED FOR EXPORT MARKETS

The grazing withholding period only applies to stock slaughtered for the domestic market.

Some export markets apply different standards. To meet these standards, ensure that **in addition** to complying with the grazing withholding period, the Export Slaughter Interval is observed before stock are sold or slaughtered.

### EXPORT SLAUGHTER INTERVAL (ESI) – 14 DAYS

LIVESTOCK THAT HAVE BEEN GRAZED ON, OR FED TREATED FORAGE, FODDER OR STUBBLE SHOULD BE PLACED ON CLEAN FEED FOR 14 DAYS PRIOR TO EXPORT SLAUGHTER

### Jurisdiction:

ALL STATES except VIC.

Note: Victoria is not included in this permit as their *Control-of-Use* legislation means that an APVMA permit is not required to legalise this off-label use in that state.

### Additional Conditions:

This Permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the DETAILS and CONDITIONS of this permit.

### Export of treated produce

Use of boscalid may result in detectable residues in Chickpeas and Lentils and not all countries have established tolerances for boscalid in these commodities. If treated produce is to be exported due account should therefore be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements.

Issued by the Australian Pesticides and Veterinary Medicines Authority
