

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT
FOR THE CONTROL OF APHIDS IN LUPINS**

PERMIT NUMBER – PER85365

This permit is issued to the Permit Holder under Section 112 of the Agricultural and Veterinary Chemicals Code, scheduled to the Agricultural and Veterinary Chemicals Code Act 1994 (the Agvet Code) of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 17 DECEMBER 2018 TO 31 DECEMBER 2023.

Permit Holder:

PULSE AUSTRALIA LIMITED
Level 10, Farrer House
24-28 Collins Street
MELBOURNE VIC 3000

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

EUROCHEM METRO 250 WP INSECTICIDE (APVMA No. 67124)

PLUS OTHER REGISTERED PRODUCTS

Containing: 250 g/kg PYMETROZINE as the only active constituent.

CHESS INSECTICIDE (APVMA No. 53311)

PLUS OTHER REGISTERED PRODUCTS

Containing: 500 g/kg PYMETROZINE as the only active constituent.

Directions for Use:

Situation	Pest	Rate
Lupins	Green Peach Aphid (<i>Myzus persicae</i>)	<u>250 g/kg product</u>
	Pea Aphid (<i>Acyrtosiphon pisum</i>)	400 g/hectare
	Cotton Aphid (<i>Aphis gossypii</i>)	<u>500 g/kg product</u>
	Cowpea Aphid (<i>Aphis craccivora</i>)	200 g/hectare

Critical Use Comments:

- Apply by boom spray in sufficient volume of water to ensure thorough coverage of foliage.
- Add a suitable wetting agent at recommended rates.
- Apply at first sign of aphid infestation. Pymetrozine has an anti-feeding effect and is not a knockdown. Best results are achieved when populations reach local thresholds and before populations reach high levels.
- DO NOT apply more than 2 applications per crop. Minimum retreatment interval is 14 days.
- DO NOT apply after BBCH 70.
- DO NOT use human flaggers/markers (unless protected by engineering controls). Comply with re-entry period on the product label.
- DO NOT apply consecutive applications of pymetrozine or other Group 9B insecticides. Refer to 'Insecticide Resistance Warning' on the product label.
- DO NOT contaminate streams, rivers or waterways with the chemical or used containers.
- DO NOT apply under conditions or from equipment that may cause spray drift onto adjacent areas, particularly wetlands, waterbodies or watercourses.

Jurisdiction:

ALL STATES except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that state.

Withholding periods:

Harvest: Not required when used as directed.

Grazing: DO NOT graze or cut for stock food for 21 days after application.

Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

Export of Produce:

To allow treated produce to be supplied or otherwise made available for human consumption, Maximum Residue Limits (MRLs) have been established for pymetrozine in the commodity 'Lupin (dry)' at 0.02 mg/kg (temporary MRL). This MRL applies only to produce marketed and consumed in Australia. If treated produce is to be exported, due account should be taken of the residue definition and residue limits/import tolerances of importing countries; any residues must not exceed requirements of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority
