Critical Use Comments:

- Apply at hatching of larvae as required. NPV is most effective on larvae up to 13mm in length.
- NPV will provide 60-90% control, therefore should not be solely relied on for pest control but used as a part of a whole management program.
- Apply by air or ground rig. Thorough coverage is essential.
- Apply with hydraulic nozzles on boom sprays and concentrate spray on plant foliage so that thorough coverage is achieved.
- Apply in the late evening or at night for optimum results.

Withholding Period:

NOT REQUIRED WHEN USED AS DIRECTED

Jurisdiction:

ALL States except Victoria

(Note: Victoria is not included in this permit because their 'control-of-use' legislation means that a permit is not required to legalise this off-label use in VIC).

Additional Conditions:

THIS PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.
