**Critical Use Comments:**

- This permit is only to be used in the event of an incursion of the exotic pest Fall Armyworm (*Spodoptera frugiperda*).
- Treatments may only be applied if there is a confirmed detection of the pest in the area to be treated, unless directed by the relevant state biosecurity authority.
- Apply when pests are first detected.
- Apply as a foliar application by boomspray.
- Apply in sufficient water to ensure thorough coverage of foliage.
- ALPHA-CYPERMETHRIN, METHOMYL and ZETA-CYPERMETHRIN: Apply up to 2 applications per crop, at minimum 7 day intervals.
- INDOXACARB: Apply 1 application per crop only.
- Sunflowers: If treatment is required during flowering, spraying must take place in the very early morning or very late afternoon to limit impact on bees.
- Refer to 'Protections' statements on the product label for conditions on protection of livestock, wildlife, the environment and non-target plants and animals.

**Withholding Periods:**

Comply with Withholding Periods and Trade Advice listed on the product label for the crop to be treated.

**Jurisdiction:**

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

**Additional Conditions:**

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.
