Critical Use Comments:
- Regularly scout crops to monitor for eggs and larvae. Treat when pests appear, targeting eggs at hatch or small larvae (prior to third instar stage) before the pest becomes entrenched.
- Repeat application depending on infestation but DO NOT exceed the maximum number of applications or contravene the retreatment interval for each crop.
- Ensure adequate spray penetration to obtain effective control of the pest.
- Follow instructions on the product label for the target crop.
- Refer to the Insecticide Resistance Management statement on the product labels to prevent or delay the development of resistance.

Witholding Period:
HARVEST: Comply with withholding periods on the product label for each crop.
GRAZING AND STOCKFOOD: Comply with withholding periods and Export Trade Advice on the product label for each crop.

Jurisdiction:
All States and Territories, except VIC.
Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.]
**Additional Conditions:**
This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

*Export of treated produce*
MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.
