

PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT

PERMIT NUMBER -PER9343

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the products can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 2 MARCH 2007 TO 3 MARCH 2012.

Permit Holder:

AUSTRALIAN OILSEEDS FEDERATION

PO Box R1826

ROYAL EXCHANGE NSW 1225

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

ALL REGISTERED PRODUCTS THAT INCLUDE DIRECTIONS FOR USE FOR CANOLA ON THE APPROVED LABEL FOR THE PRODUCT.

(Excluding herbicides containing the following active constituents:

Ethyl dipropylthiocarbamate (trade name: **Eptam Selective Pre-Emergent Herbicide**),

Butoxydim and Fluazifop-P (trade name: **Fusion Super WG Herbicide and Fusion WG Herbicide**) and

Pendimethalin (trade name example: **Stomp 330E Herbicide**).

Directions for Use:

Crop	Pest/Disease/weeds	Rate
Mustard (oilseed cultivars) (<i>Brassica juncea</i>)	As approved for Canola.	As per current use rates, timing, frequency and method of application defined on product labels registered for use on Canola.

Critical Use Comments:

Refer to the approved product label for critical comments, timing, frequency and method of application for Canola.

Crop sensitivity and tolerance:

The sensitivity and tolerance of Mustard (*Brassica juncea*) to products included under this permit has not been fully evaluated. It is advisable, therefore, to only treat a small number of plants to ascertain their reaction before treating the whole crop.

Brassica juncea has shown sensitivity to clopyralid. Experience suggests that early application timing of herbicides containing clopyralid, at the 2-6 leaf stage of the crop, generally reduces the risk of potential crop damage.

Note those herbicides excluded from this permit refer to '**Products to be Used**' above.

Withholding Period:

Adhere to all withholding periods and restrictions as detailed on approved product labels for products registered for use on Canola.

Jurisdiction:

ACT, NSW, SA, TAS, WA only.

(Note: Victoria is not included in this permit because their 'control-of-use' legislation means that an APVMA permit is not required to legalise this off-label use in VIC. However certain products used in Victoria require State approval. **For further information please contact the Victorian Chemical Standards Branch, DPI.**

Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

Issued by

Delegated Officer
