

**PERMIT TO ALLOW EMERGENCY USE
OF A REGISTERED AGVET CHEMICAL PRODUCT**

PERMIT NUMBER -PER9559

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 27 NOVEMBER 2006 TO 31 JANUARY 2009.

Permit Holder:

**AUSTRALIAN OILSEEDS FEDERATION
PO Box R1826
ROYAL EXCHANGE NSW 1225**

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

DUPONT STEWARD INSECTICIDE

Containing:200 g/L INDOXACARB (25:75) as their only active constituent.

Directions for Use:

DO NOT apply after the heads have turned down.

DO NOT apply by ULV methods.

Crop	Pest	Rate
Sunflower	Heliothis (<i>Helicoverpa spp.</i>), Rutherglen bug, Grey cluster bug (<i>Nysius spp.</i>)	400 mL/ha

Critical Use Comments:

Helicoverpa spp : Target brown eggs and hatchings (neonates or 1st instar) to small larvae (2nd instar) when they reach economic spray threshold and before heads turn down.

Nysius spp: Apply as required against above threshold pest densities. Multiple sprays may be required due to low threshold and long period of susceptibility.

Use in accordance with Steward label particularly regarding the ‘**Restraints**’, ‘**Product use**’, and the various ‘**Protection**’ statements for protection of bees, the environment, and beneficial non-target insects.

Withholding Period:

Harvest: DO NOT harvest for 28 days after application.

Grazing: DO NOT graze or cut for stockfood for 28 days after application.

Livestock destined for export markets:

The withholding period for grazing only applies to stock slaughtered for the domestic market. Some export markets may apply different grazing standards. To meet these standards, ensure that the *Export Slaughter Interval* or the *Export Grazing Interval* is observed before stock are sold or slaughtered.

Export Slaughter Interval (ESI) - 28 Days (or 4 weeks):

Livestock that have been grazing on or fed treated crops should be placed on clean feed for 28 days (4 weeks) prior to export slaughter

Jurisdiction:

NSW, QLD only.

Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

Export of Produce:

Exported produce or animals must have appropriate residue tolerance limits established in the importing countries and any residues must not exceed the tolerance limits.

OTHER MATTERS

Residues:

To allow produce from treated plants or animals to be supplied or otherwise made available for human or animal consumption the APVMA has established the following temporary maximum residue limits (TMRLs) in the *MRL Standard*:

Table 1

Compound	Food		MRL (mg/kg)
Indoxacarb	SO 0702	Sunflower seed	T1
