Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF BITOU BUSH AND BONESEED IN SAND DUNES,
BUSHLAND AND GRASSLAND**

PERMIT NUMBER – PER12251

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 1 JANUARY 2011 TO 31 MARCH 2026

Permit Holder:

NATIONAL PARKS AND WILDLIFE SERVICE
43 Bridge Street
HURTSVILLE NSW 2220

Persons who can use the product under this permit:

Staff or contractors employed/contracted by the NSW National Parks and Wildlife Service or agencies/organisations represented on the NSW Local Land Services Regional Weeds Committees.

CONDITIONS OF USE

Products to be used:

ROUNDUP BIACTIVE HERBICIDE (APVMA No. 48518)

PLUS OTHER REGISTERED PRODUCTS

Containing: 360 g/L GLYPHOSATE present as the isopropylamine salt as the only active constituent.

MACSPRED METMAC 600 HERBICIDE (APVMA No. 52735)

PLUS OTHER REGISTERED PRODUCTS

Containing: 600 g/kg METSULFURON-METHYL as the only active constituent.

RESTRAINT:

600 g/kg metsulfuron-methyl products:

DO NOT spray if rainfall is expected within 2 hours of spraying.

DO NOT store the prepared spray for more than 2 days.

Directions for Use:

Situation	Weed	Rate
Coastal sand dunes, bushland and grassland	Bitou Bush <i>(Chrysanthemoides monilifera spp. rotundata)</i>	<u>360 g/L glyphosate products:</u> 2 L/ha
	Boneseed <i>(Chrysanthemoides monilifera spp. monilifera)</i>	<u>600 g/kg metsulfuron-methyl products:</u> 20 – 30 g/ha

Critical Use Comments:

- Apply by helicopter only, using aerial boom spraying equipment. Apply by helicopter only to treat dense and/or large infestations which cannot be treated by other means due to inaccessibility or size of infestation.
- Pilot must hold a current pilot licence in NSW to apply pesticides by air, and comply with the requirements of Pesticide Order AIR-1.
- Spray to thoroughly wet all target-plant foliage.
- Avoid contact with non-target native plants.
- Spraying must be done in accordance with the Aerial Spraying Guidelines (NPWS 2022), to ensure that pesticide application is undertaken in a manner that provides effective control of bitou bush with suitable environmental controls in place.
- The guidelines include a checklist and technical information (requirements for Job Safety Analysis, Pesticide Operations Plans, etc.) that should be followed when implementing aerial boom spray programs.
- The guidelines are available for download from <https://www.environment.nsw.gov.au/research-and-publications/publications-search/aerial-spraying-guidelines>
- For application in riparian areas the product to be used must contain the same concentration of active constituent(s) stated in the products to be used above and must be registered for use in aquatic situations.

Jurisdiction:

NSW only.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

Issued by the Australian Pesticides and Veterinary Medicines Authority
