Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF BLUE HELIOTROPE IN FALLOW, PASTURES AND
NON-ARABLE AREAS**

PERMIT NUMBER – 12286

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 4 OCTOBER 2010 TO 30 SEPTEMBER 2023

Permit Holder:

NSW DEPARTMENT OF PRIMARY INDUSTRIES
161 Kite Street
ORANGE NSW 2800

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

NUFARM ASSOCIATE HERBICIDE (APVMA No. 46361)

PLUS OTHER REGISTERED PRODUCTS

Containing: 600 g/kg METSULFURON-METHYL as the only active constituent.

RESTRAINT:

DO NOT store a suspension of the product for more than two days otherwise significant breakdown will occur.

DO NOT apply to crops under stress.

DO NOT store tank mixes of the product.

DO NOT apply if rainfall is expected within 2 hours.

DO NOT treat newly sown pastures as severe damage may occur.

DO NOT use on pasture seed crops.

DO NOT apply to weeds that are under stress or not actively growing.

Directions for Use:

Situation	Pest	Rate
Fallow, Pasture, non-arable Areas (Public Land, National Parks)	Blue Heliotrope (<i>Heliotropium amplexicaule</i>)	Spot spray at 10 g/100 L plus 0.1% surfactant

Critical Use Comments:

- Spray when plants are actively growing from late spring to autumn¹ at commencement of flowering and before seed set.
- DO NOT apply under stressed conditions from lack of moisture or in high temperatures.
- Spray to thoroughly wet all foliage.
- It is recommended not to graze treated areas for 2 to 3 days to ensure product efficacy.

Note 1. Blue heliotrope plants usually commence flowering in November and continue through the summer until March. The plant is frost-susceptible, dying off in the winter months and regenerating from the vigorous root system in the following spring. In frost-free areas, the plant is capable of growing and flowering at any time of the year following rain.

Withholding Period:

Grazing: Not required when used as directed.

Jurisdiction:

NSW only.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

Issued by the Australian Pesticides and Veterinary Medicines Authority.

Note: 1/06/2020 – Permit expiry extended to 30/06/2023. Permit issued as Version 3.
