- Refer to product label buffer zones.

Maximum number of applications per unit area per year:

- Apply via aerial application only DO NOT exceed a maximum of three (3) fenitrothion applications per unit area per year observing a minimum re-treatment interval of 14 days between consecutive applications.

Withholding Period:

Harvest: Do not harvest for 12 weeks after application.

Grazing: Do not graze or cut for stock food for 12 weeks weeks after application.

Jurisdiction:

NSW, QLD, NT and WA only.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

To Avoid Crop Damage

The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.

Export of treated produce

Maximum Residue Limits (MRLs) have been established to allow treated produce to be used for human and/or animal consumption. MRLs can be found in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard)*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Other Matters

Continued issuance of this permit is subject to the outcomes of the current APVMA review of fenitrothion. This permit may be impacted by the outcomes of this review.

Issued by the Australian Pesticides and Veterinary Medicines Authority
