

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL PRODUCT  
FOR THE CONTROL OF HYGROPHILA AND SENEGAL TEA PLANT  
IN SEMI-AQUATIC AND AQUATIC SITUATIONS**

**PERMIT NUMBER – PER14729**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 1 JULY 2014 TO 30 JUNE 2024.**

**Permit Holder:**

NSW DEPARTMENT OF PRIMARY INDUSTRIES  
161 Kite Street  
ORANGE NSW 2800

**Persons who can use the product under this permit:**

Persons trained or experienced in the preparation and use of agricultural chemicals.

## CONDITIONS OF USE

### Product to be used:

MACSPRED METMAC 600 HERBICIDE (APVMA No. 52735)

PLUS OTHER REGISTERED PRODUCTS

Containing 600 g/kg METSULFURON-METHYL as the only active constituent.

ROUNDUP BIACTIVE HERBICIDE (APVMA No. 48518)

PLUS OTHER REGISTERED PRODUCTS

Containing 360 g/L GLYPHOSATE as their only active constituent.

ONLY USE GLYPHOSATE PRODUCTS REGISTERED FOR USE IN AQUATIC AREAS.

### Directions for Use:

Situation	Pest Plant	Rate
AQUATIC AND SEMI-AQUATIC SITUATIONS (non-potable water areas only)	HYGROPHILA ( <i>Hygrophila costata</i> )	<b>Glyphosate:</b> 1 L product /100 L water
	SENEGAL TEA PLANT ( <i>Gymnocoronis spilanthoides</i> )	<b>Metsulfuron-methyl:</b> 5 – 10 g product / 100 L water

### Critical Use Comments:

- Hygrophila can be sprayed all year round; repeat treatments may be necessary.
- Senegal Tea Plant can only be sprayed from 1<sup>st</sup> August to 30<sup>th</sup> April; repeat treatments may be necessary.
- Apply spray directly onto the target weed, DO NOT broadcast spray over the water.
- DO NOT spray directly onto water surface and/or non-target species.
- DO NOT continue spraying if any adverse effects on non-target organisms such as fish or invertebrates are noticed.
- The APVMA and the environment protection authority in the state of use must be notified of any illness, injury or death caused to non-target organisms.

#### *Metsulfuron-methyl only:*

- DO NOT apply more than 3 times per year. Applications should be 30 days apart. Minimise off target damage and water pollution by spraying towards the bank.
- Care must be taken when mixing to avoid soil contamination that may lead to surface or ground water contamination.

### Jurisdiction:

NSW and QLD only.

### Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

**NOTIFICATION TO WATER USERS:**

Ten days prior to spraying, permit users must notify all landholders and water users (to a point where the herbicide is no longer detectable), including the appropriate Water Supply Authority.

Users must liaise with NSW Health or QLD Health in relation to potential risk to public health from people drinking or otherwise coming into contact with treated water.

Issued by the Australian Pesticides and Veterinary Medicines Authority.

Note: 08 July 2019; Glyphosate products removed from this permit (glyphosate use permitted under another permit). Conditions updated to reflect relevant QLD government authorities. Expiry date extended to 30 June 2024. Permit issued as Version 2.

24 December 2020; Glyphosate products re-instated on permit, Metsulfuron product updated to APVMA No. 52735. Permit issued as Version 3.
