

PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT

**FOR CONTROL OF WHITE ROT DISEASE ON CHINESE ONION, LEEKS,
SHALLOTS, SPRING ONIONS AND WELSH ONIONS**

PERMIT NUMBER - PER14906

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 22 OCTOBER 2014 to 31 OCTOBER 2024.

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 7, 141 Walker St
NORTH SYDNEY NSW 2060.

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

ALLITRON SYSTEMIC FUNGICIDE (APVMA No. 63023)
PLUS OTHER REGISTERED PRODUCTS

Containing: 375 g/L TRIADIMENOL as the only active constituent.

Directions for Use:

Crop Type	Plant Disease	Application Rate
CHINESE ONION LEEKS SHALLOTS SPRING ONIONS WELSH ONIONS	WHITE ROT (<i>Sclerotium cepivorum</i>)	1 L product / ha

Critical Use Comments:

- Apply initial foliar spray 6 – 8 weeks after planting, then two further applications at 3 – 4 week intervals.
- DO NOT apply more than three sprays per season.
- Thorough coverage of all foliage is essential for effective control. Apply to the point of run-off, using spray volumes between 100 - 500 L water/ha, depending on crop growth stage and planting density.

Withholding Period:

Harvest – DO NOT harvest for 28 DAYS after application.

Jurisdiction:

ACT, NSW, QLD, SA, TAS, WA & NT.

Note: Victoria is not included in this permit, as their *Control-of-Use* legislation does not require a permit to be issued to legalise this off-label use in that state.

Additional Conditions:

This PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

PERSONS who wish to prepare for use and/or use the products for the purposes specified in this permit must read, or have read to them, the permit particularly the information included in DETAILS and CONDITIONS of this permit.

To Avoid Crop Damage

The sensitivity of some species and varieties of the crops to be treated under this permit has not been fully evaluated. It is advisable, therefore, to only treat a small number of plants to ascertain their reaction before treating the whole crop.

Residues & Export of Produce

To allow produce from treated plants to be supplied or otherwise made available for consumption the APVMA has established the following temporary Maximum Residue Limits (TMRLs):

<u>Triadimenol</u>	<u>mg/kg</u>
Leek	T3
Onion, Chinese	T3
Onion, Welsh	T3
Shallot	T3
Spring onion	T3

These limits only apply to produce marketed and consumed within Australia. If triadimenol treated produce is to be exported, due account should be taken of the tolerance limits of importing countries and any residues must not exceed those tolerance limits.

Issued by Australian Pesticides and Veterinary Medicines Authority

Note: Permit amended to update holder details. Permit version 2 issued 4 May 2018.

24 July 2019 - Permit amended to remove chives use pattern, update permit holder address and extend expiry date to 31 October 2024. Permit issued as version 3.
