

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF WHITE ROT DISEASE IN CHINESE ONIONS,
LEEKS, SHALLOTS, SPRING ONIONS AND WELSH ONIONS**

PERMIT NUMBER – PER14906

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 22 OCTOBER 2014 TO 31 JULY 2029

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LIMITED
Level 7, 141 Walker Street
NORTH SYDNEY NSW 2060

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

ALLITRON SYSTEMIC FUNGICIDE (APVMA No. 63023)

PLUS OTHER REGISTERED PRODUCTS

Containing: 375 g/L TRIADIMENOL as the only active constituent.

Directions for Use:

Crops	Disease	Rate
Chinese onions Leeks Shallots Spring onions Welsh onions	White rot (<i>Sclerotium cepivorum</i>)	1 L product / ha

Critical Use Comments:

- Apply initial foliar spray 6 - 8 weeks after planting, then 2 further applications at 3 - 4 week intervals.
- DO NOT apply more than 3 sprays per season.
- Thorough coverage of all foliage is essential for effective control. Apply to the point of run-off, using spray volumes between 100 - 500 L water/ha, depending on crop growth stage and planting density.

Withholding Period:

Harvest: Do not harvest for 28 days after application.

Jurisdiction:

All States and Territories except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

To Avoid Crop Damage

The sensitivity of the crops to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.

Export of treated produce

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human consumption. TMRLs have been established for TRIADIMENOL in CHINESE ONION, SHALLOT AND GREEN ONIONS. MRLs can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*. MRLs apply only to produce marketed and consumed in Australia. If treated

produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by Australian Pesticides and Veterinary Medicines Authority

Note: Permit amended to update holder details. Permit version 2 issued 4 May 2018.

24 July 2019 - Permit amended to remove chives use pattern, update permit holder address and extend expiry date to 31 October 2024. Permit issued as version 3.
