

**Australian Government**  
**Australian Pesticides and  
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL  
PRODUCT FOR CONTROL OF VARIOUS MITES IN PEAS**

**PERMIT NUMBER – PER80558**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 10 NOVEMBER 2015 TO 30 JUNE 2025**

**Permit Holder:**

HORTICULTURE INNOVATION AUSTRALIA LTD  
Level 7, 141 Walker Street,  
NORTH SYDNEY NSW 2060

**Persons who can use the product under this permit:**

Persons generally.

## CONDITIONS OF USE

### Products to be used:

ACRAMITE MITICIDE (APVMA No. 55264)

Containing: 480 g/L BIFENAZATE as the only active constituent.

### Directions for Use:

Crop	Pest	Rate
Snow peas and sugar snap peas.	Two spotted mite ( <i>Tetranychus urticae</i> ), Red tomato spider mite ( <i>Tetranychus evansi</i> ) European red mite ( <i>Panonychus ulmi</i> ), Bryobia mite ( <i>Bryobia rubrioculus</i> )	65 mL / 100 L

### Critical Use Comments:

- DO NOT use if rainfall is expected before spray has dried as reduced efficacy may result.
- Apply to point of runoff as soon as mites appear.
- Equipment should be calibrated so that no less than 1000L of water is applied per hectare.
- DO NOT apply more than 1 application per season.

### Withholding Period:

Harvest: DO NOT harvest for 3 days after application.

Grazing: DO NOT graze or cut for stockfood for 3 days after application.

Grazing: DO NOT send animals for slaughter that have grazed or been fed treated pea vines UNLESS they are first placed on clean feed for 4 days before leaving the farm.

### Jurisdiction:

ALL States except Vic and NT.

(Note: Victoria is not included in this permit because their 'control-of-use' legislation means that a permit is not required to legalise this off-label use in VIC).

### Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

### *Export of treated produce*

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human or animal consumption. A TMRL has been established for bifenazate in Podded pea (young pods) [snow and sugar snap] for human consumption, and in Pea vines (green) for animal fodder. MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: Permit amended to update holder. Permit version 2 issued 10/05/2018

Permit expiry extended to 30/06/2025. Permit version 3 issued 10/06/2020.
