

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT
FOR THE CONTROL OF SILVERLEAF WHITEFLY IN NAVY BEANS**

PERMIT NUMBER – PER81609

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 1 MARCH 2016 TO 31 JANUARY 2024.

Permit Holder:

PULSE AUSTRALIA LIMITED
30 Coronga Street
KILLARA NSW 2071

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

NUFARM NUPRID 350SC INSECTICIDE (APVMA NO. 60587)

PLUS OTHER REGISTERED PRODUCTS

Containing: 350 g/L IMIDACLOPRID as their only active constituent.

Directions for Use:

Crop	Pest	Rate
NAVY BEANS (<i>Phaseolus vulgaris</i>)	SILVERLEAF WHITEFLY (<i>Bemisia tabaci</i>)	14mL/100 m of row

Critical Use Comments:

- Apply in at least 2L of water per 100m of row.
- Apply to open furrow not earlier than 5 days prior to planting as a narrow band of spray centred under the plant row.
- DO NOT apply more than one soil application of imidacloprid to each crop.
- DO NOT use imidacloprid again or any other Group 4A insecticide as a foliar spray to that crop following the soil application.

Withholding Period:

Harvest: NOT Required when used as directed.

Grazing: DO NOT graze or cut for stockfood for 6 weeks after application.

Jurisdiction:

QLD and NSW only.

Additional Conditions:

This permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

Export of treated produce

Use of imidacloprid may result in detectable residues in navy beans for which key export markets may not have established tolerances. If treated produce is to be exported, due account should be taken of the residue definition and residue limits/import tolerances of importing countries, and any residues must not exceed those requirements.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: Permit amended to extend expiry date to 31 January 2024. Permit version 2 issued 31 May 2018.
