

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF CERTAIN BROADLEAF WEEDS IN FABA BEANS**

PERMIT NUMBER – PER82634

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 16 JUNE 2017 TO 31 JULY 2026

Permit Holder:

PULSE AUSTRALIA LIMITED
Suite 501, Level 5
6 Help Street
CHATSWOOD NSW 2067

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

BASAGRAN POST-EMERGENCE HERBICIDE (APVMA No. 31608)

PLUS OTHER REGISTERED PRODUCTS

Containing: 480 g/L BENTAZONE as the only active constituent.

RESTRAINT:

DO NOT apply under hot, dry conditions.

Directions for Use:

Crop	Pest	Rate	Critical Comments
Faba beans	Broadleaf Weeds As listed on the approved label for Broad beans	1 L/ha	Apply when weeds are less than two true leaves.
		2 L/ha	Apply when faba bean plants are at the two leaf stage or earlier and weeds are less than 5cm high.
		3 L/ha	Ensure weeds are less than 5cm high, and faba bean plants are developed past the two leaf stage.

Critical Use Comments:

- Apply as a foliar application via boom spray.
- Use a spray volume of 220-440 L/ha.
- DO NOT apply more than 1 application per crop.

Crop Safety:

- Beans are tolerant of Basagran after the first two trifoliolate leaves are fully expanded. There may be leaf scorch but this will not affect yields.
- Avoid applications during cold, frosty or drought conditions. Refer to the section titled “*The Effects of Stress and Weather*” on the product label for further information before applying the product.

Withholding Period:

Harvest: Do not harvest for 8 weeks after application.

Grazing: Do not graze or cut for stock food.

Jurisdiction:

NSW & QLD only.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

To Avoid Crop Damage

The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.

Export of treated produce

Maximum Residue Limits (MRLs) have been established to allow treated produce to be used for human and/or animal consumption. An MRL has been established for BENTAZONE in PULSES. MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 29/07/2021 – Permit updated to add NSW. Permit expiry extended to 31/07/2026. Permit issued as Version 2.
