**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF BROADLEAF WEEDS IN FABA BEANS**

PERMIT NUMBER – PER82748

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 20 SEPTEMBER 2016 TO 31 OCTOBER 2026

Permit Holder:

PULSE AUSTRALIA LIMITED
Suite 501, Level 5, 6 Help Street
CHATSWOOD NSW 2067

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

SPINNAKER 700 WDG HERBICIDE (APVMA No. 49625)

PLUS OTHER REGISTERED PRODUCTS

Containing: 700 g/kg IMAZETHAPYR as the only active constituent.

Directions for Use:

Crop	Pest	Rate
Faba beans (<i>Vicia faba</i>) (Pre-emergence)	Weeds as per the product label which are listed to be controlled in faba beans (pre-emergence).	70-100 g/ha Follow the rate for each target weed as specified on the product label.

Critical Use Comments:

- Apply at the pre-emergent crop stage.
- Apply to moist well prepared clod free and weed-free soil after planting and before crop emergence. Sufficient rainfall or irrigation is required after application and prior to weed emergence to wet soil to a depth of 5cm.
- Apply as a broadcast spray by ground or aerial boomspray.
- Use a spray volume of 50-100 L/ha for ground application or at least 20 L/ha for aerial application.
- DO NOT apply more than 1 application per crop.
- Weeds may not be totally controlled but populations will be significantly reduced and surviving plants will generally be severely retarded.
- Refer to the product label for crop safety and efficacy warnings related to soil type and treatment conditions.

Withholding Period:

Harvest: Not required when used as directed.

Grazing: Do not graze or cut for stock food for 14 days after application.

Jurisdiction:

QLD only.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 19/10/2021 – Permit updated to include specific instructions for aerial treatment, more clearly specify target weeds and rates, include reference to soil type warnings on the product label, include harvest WHP statement, and remove export of produce statement. Permit expiry extended to 31/10/2026. Permit issued as Version 2.
