

PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT

FOR CONTROL OF LEPIDOPTERAN PESTS IN BLUEBERRIES

PERMIT NUMBER – PER84178

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 31 OCTOBER 2017 to 30 NOVEMBER 2022

Permit Holder:

AUSTRALIAN BLUEBERRY GROWERS ASSOCIATION
Wollongbar Primary Industries Institute
1243 Bruxner Highway
WOLLONGBAR NSW 2480

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

CORAGEN INSECTICIDE [APVMA No. 61519]

Containing: 200 g/L CHLORANTRANILIPROLE as their only active constituent

Directions for Use:

Crop Type	Insect Pests	Application Rate
BLUEBERRIES (Field and Protected)	Lepidopteran Pests	40 mL product / 100 L

Critical Use Comments:

- Monitor crops and commence applications when populations reach determined economic threshold levels.
- Apply using calibrated ground airblast or boom sprayer or similar equipment.
- Thorough, even coverage of all foliage and canes/branches is essential. Apply spray to the point of first run-off. A spray volume of 600 – 800 L/ha is recommended, with the higher volume used for crops comprising larger, mature bushes.
- DO NOT apply more than three (3) applications per crop, with a minimum re-treatment interval of 7 days between sprays.
- Add non-ionic surfactant/wetting agent in accordance with label directions.
- When further insecticide applications are necessary, rotate to an approved product from a different Mode of Action (MoA) group.
- Observe *Restrictions* listed under *Directions for Use* on the approved label.

Withholding Period:

Harvest: DO NOT harvest for 3 DAYS after application.

Jurisdiction:

ALL STATES.

Additional Conditions:

This PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

PERSONS who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the DETAILS and CONDITIONS of this permit.

Export of treated produce:

To allow produce from treated blueberry bushes to be supplied or otherwise made available for consumption, the APVMA has established a temporary Maximum Residue Limit (TMRL) of T3 mg/kg for Chlorantraniliprole in Blueberries. This limit applies only to produce marketed and consumed in Australia. If treated produce is to be exported due account should be taken of the residue definition and residue limits/import tolerances of importing countries and that any residues must not exceed those requirements of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority
