This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 22 MAY 2017 TO 31 JULY 2027**

**Permit Holder:**

GREENLIFE INDUSTRY AUSTRALIA LIMITED  
c/- AGAWARE CONSULTING PTY LTD  
21 Rosella Avenue  
STRATHFIELDSAYE VIC 3551

**Persons who can use the product under this permit:**

Persons generally.

## CONDITIONS OF USE

### Product to be used:

BARRICADE HERBICIDE (APVMA No. 62982)

Containing: 480 g/L PRODIAMINE as the only active constituent.

### Directions for Use:

Crop	Pest	Rate
Nursery Stock (non-food) seedlings and plugs, potted colour, trees and shrubs, foliage plants, palms, grasses and fruit trees (non-bearing)	Pre-emergent control of Grass and broad leaf weeds  (as per Barricade Herbicide label)	1.6 - 3.5 L/ha  OR  16 - 35 mL/100 m <sup>2</sup>

### Critical Use Comments:

- Make foliar or soil application using low boom sprayer, knapsack or equivalent, keeping the sprayer close to target in order to avoid spray drift.
- Immediately following foliar application, apply overhead irrigation to the foliage to wash the product from plants surfaces onto the soil (watering beforehand may aid this process).
- Delay application to newly transplanted container or field nursery stock and landscape plantings until soil has settled around transplants.
- Works best when applied prior to emergence in early autumn or spring for residual control of up to 6 months.
- Repeat applications (3 to 4 months after initial application) may be needed if lower rates are used in high weed pressure situations, or during extended germination periods due to environmental conditions. DO NOT exceed a total 3.5 L product/ ha during production season.

### Newly transplanted container or field nursery stock:

- Water transplants thoroughly before application.
- Apply after cuttings form roots and are established.

### Bare ground application for container placement:

- Apply to soil (including, mulch, gravel, wood chips or other permeable base) upon which containerised ornamentals are placed.
- After application, perform shallow cultivation or hand weeding only, to avoid disturbing the herbicide barrier.

### Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

### Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

*Phytotoxicity Warning*

Foliar application of this product may result in unacceptable phytotoxicity to rapidly growing tissue or buds, especially in spring where rapid growth is occurring. To reduce the possibility of injury delay application until new growth has hardened unless previous testing has demonstrated acceptable results.

*To Avoid Crop Damage*

The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 22/07/2022 – Permit jurisdiction updated to ‘All States and Territories, except VIC’. Additional conditions updated to current standard. Permit expiry extended to 31/07/2027. Permit issued as Version 2.
