

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT**

**FOR CONTROL OF GREY MOULD ON BLUEBERRIES**

**PERMIT NUMBER – PER86489**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 25 JANUARY 2019 to 31 JANUARY 2024**

**Permit Holder:**

AUSTRALIAN BLUEBERRY GROWERS ASSOCIATION  
Wollongbar Primary Industries Institute  
1243 Bruxner Highway  
WOLLONGBAR NSW 2480

**Persons who can use the product under this permit:**

Persons generally.

## CONDITIONS OF USE

### Product to be used:

TELDOR 500 SC FUNGICIDE [APVMA No. 50670]

Plus other REGISTERED PRODUCTS

Containing: 500 g/L FENHEXAMID as the only active constituent.

### Directions for Use:

Crop Type	Target Disease	Application Rate
BLUEBERRIES Field and Protected	Grey mould ( <i>Botrytis cinerea</i> )	100 mL product / 100 L

### Critical Use Comments:

- Reduce background levels of disease by removing plant debris and rotted fruit.
- Apply at first signs of infection or at white bud.
- DO NOT exceed a maximum of four (4) applications per crop per season with not more than two (2) applications sequentially before using another fungicide from a different MoA chemical group.
- Allow a minimum re-treatment interval of 7-10 days between consecutive applications.
- Apply using airblast, knapsack or equivalent equipment.
- Use spray volume of 600 – 1,000 L/ha; ensuring thorough coverage of all plant surfaces.

### Withholding Period:

DO NOT harvest for 1 DAY after application.

### Jurisdiction:

ALL STATES except VIC

Note: Victoria is not included in this permit, as their *Control-of-Use* legislation means a permit is not required to legalise this off-label use in that state.

### Additional Conditions:

This PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on the label.

PERSONS who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the DETAILS and CONDITIONS of this permit.

### Export of Produce

To allow treated produce to be supplied or otherwise made available for human consumption, temporary (T) Maximum Residue Limit (MRL) has been established for Fenhexamid in Blueberries at T5 mg/kg. This MRL applies only to produce marketed and consumed in Australia. Treated crop commodities destined for export may require extra time being allowed between application and harvest, to be accepted in some export markets. Before you use this product, you are advised to contact the Australian Blueberry Growers Association about any potential trade issues and their management.

Issued by the Australian Pesticides and Veterinary Medicines Authority
