**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF BEAN POD BORER IN MUNG BEANS**

PERMIT NUMBER – PER87650

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 27 JUNE 2019 TO 31 AUGUST 2029

Permit Holder:

GRAIN PRODUCERS AUSTRALIA LIMITED
12 Cooma Road
BRAIDWOOD NSW 2622

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

STEWARD EC INSECTICIDE (APVMA No. 59573)

PLUS OTHER REGISTERED PRODUCTS

Containing: 150 g/L INDOXACARB as the only active constituent.

RESTRAINT:

DO NOT apply more than one application of this product per crop.

DO NOT apply if rainfall is expected within 2 hours.

DO NOT apply within 50 metres (aerial application) or 20 metres (ground application) when there are livestock, pasture, or any land producing feed for livestock, downwind from the application area.

SPRAY DRIFT RESTRAINTS:

Specific definitions for terms used in this section can be found at apvma.gov.au/spraydrift

DO NOT allow bystanders to come into contact with the spray cloud.

DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift. Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.

DO NOT apply unless the wind speed is between 3 and 20 kilometres per hour at the application site during the time of application.

DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature conditions exist most evenings one to two hours before sunset and persist until one to two hours after sunrise.

Directions for Use:

Crop	Pest	Rate
Mung Beans	Bean pod borer (<i>Maruca vitrata</i>)	400 mL / ha

Critical Use Comments:

- Apply as a foliar spray in a spray volume of 100 L/ha by ground (boom sprayer) application or no less than 30 L/ha by aerial application.
- Use indoxacarb as part of an insect management strategy, i.e. apply when infestation reaches an economically damaging level and repeat if necessary.
- Target hatchlings (neonate to 1st instar) to small larvae.
- Alternate with an insecticide of a different group.

Withholding Period:

Harvest: Do not harvest for 21 days after application.

Grazing: Do not graze or cut for stock food for 21 days after application.

Livestock destined for export markets:

The above withholding period for grazing only applies to stock slaughtered for the domestic market. Some export markets apply different standards. To meet these standards, ensure that the Export Slaughter Interval (below) is observed before stock are sold or slaughtered.

Export Slaughter Interval (ESI): 28 days. Livestock that have been grazing on or fed treated crops and/or over-sprayed should be placed on clean feed for 28 days (4 weeks) prior to export slaughter.

Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 20/08/2024 – Permit updated to apply current general spray drift restraints. Permit expiry extended to 31/08/2029. Permit issued as Version 2.
