

PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT

FOR THE CONTROL OF BEAN POD BORER IN MUNG BEANS

PERMIT NUMBER – PER87650

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 27 JUNE 2019 TO 30 JUNE 2024.

Permit Holder:

PULSE AUSTRALIA LIMITED
30 Coronga Street
KILLARA NSW 2071

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Product to be used:

STEWARD EC INSECTICIDE (59573)

PLUS OTHER REGISTERED PRODUCTS

Containing: 150 g/L INDOXACARB as their only active constituent.

Directions for Use:

Restraints:

- **DO NOT** apply more than one application of this product per crop.
- Alternate with an insecticide of a different group.
- **DO NOT** apply if rainfall is expected within 2 hours.
- **DO NOT** apply when wind speed is less than 3 and greater than 20 kilometres per hour or during weather conditions when surface temperature inversions can develop.
- **DO NOT** apply within 50 metres (aerial application) or 20 metres (ground application) when there are livestock, pasture, or any land producing feed for livestock, downwind from the application area.

Crop	Pest	Rate
Mung beans	Bean pod borer (<i>Maruca testualis</i>)	400 mL/ha

Critical Use Comments:

- Apply as a foliar spray in a spray volume of 100 L/ha by ground (boom sprayer) application or no less than 30 L/ha by aerial application.
- Use indoxacarb as part of an insect management strategy, i.e. apply when infestation reaches an economically damaging level and repeat if necessary.
- Target hatchlings (neonate to 1st instar) to small larvae.

Withholding Periods:

Harvest: DO NOT harvest for 21 DAYS after application.

Grazing: DO NOT graze or cut foliage for livestock feed for 21 DAYS after application.

Livestock destined for export markets

The above withholding period for grazing only applies to stock slaughtered for the domestic market. Some export markets apply different standards. To meet these standards, ensure that the Export Slaughter Interval (below) is observed before stock are sold or slaughtered.

Export Slaughter Interval (ESI): 28 days. Livestock that have been grazing on or fed treated crops and/or over-sprayed should be placed on clean feed for 28 days (4 weeks) prior to export slaughter.

Jurisdiction:

ALL STATES and TERRITORIES.

Additional Conditions:

This Permit provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label (including label RESTRAINTS).

Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit.

Issued by the Australian Pesticides and Veterinary Medicines Authority
