

**Australian Government**  
**Australian Pesticides and  
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL PRODUCT  
FOR CONTROL OF NUTGRASS IN SULFONYL UREA TOLERANT SOYA BEANS**

**PERMIT NUMBER – PER88483**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 31 MARCH 2020 TO 31 AUGUST 2026**

**Permit Holder:**

AUSTRALIAN OILSEEDS FEDERATION INC  
30 Coronga Crescent  
KILLARA NSW 2071

**Persons who can use the product under this permit:**

Persons generally.

## CONDITIONS OF USE

### Products to be used:

SEMPRA HERBICIDE (APVMA No. 56620)

PLUS OTHER REGISTERED PRODUCTS

Containing: 750 g/kg HALOSULFURON-METHYL as the only active constituent.

### RESTRAINT:

DO NOT apply this herbicide to conventional soya bean varieties as severe crop injury will occur.

DO NOT apply after the onset of frosts.

DO NOT apply this product through any type of irrigation system.

DO NOT apply if heavy rain is expected within at least 48 hours.

### Directions for Use:

Crop	Pest	Rate
Sulfonyl urea tolerant Soya Beans (Varieties: New Bunya HB1, Mossman HB1, Kuranda HB1)	Nutgrass ( <i>Cyperus rotundus</i> )	65-130 g/ha

### Critical Use Comments:

- Apply early post-emergent to the crop up to the 1<sup>st</sup> trifoliolate leaf stage.
- Apply as foliar application by boomspray with flat fan nozzles or flood jets, as a broadcast or directed treatment.
- Apply in a minimum spray volume of 80 L/ha.
- Best results are achieved when the majority of nutgrass plants are 3-4 leaf stage. Use the higher rate for dense infestations or for maximum control.
- DO NOT apply more than 1 application per crop.
- Add an adjuvant in accordance with label instructions.
- Comply with 'Protections' statements on the product label.
- Refer to product label for information on plant-back intervals of following crops.

### Withholding Period:

Harvest: Not required when used as directed.

Grazing: Do not graze or cut for stock food for 4 weeks after application.

### Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

### Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

*To Avoid Crop Damage*

The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.

*Export of treated produce*

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human and animal consumption. TMRLs have been established for HALOSULFURON-METHYL in Soya bean (dry), Soya bean fodder and Soya bean forage (green). MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 23/08/2023 – S161 statement added. Permit expiry extended to 31/08/2026. Version 1 expired on 31/03/2023. Permit issued as Version 2 on 23/08/2023.
