**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF RED IMPORTED FIRE ANT IN VARIOUS SITUATIONS**

PERMIT NUMBER – PER88626

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 21 OCTOBER 2019 TO 31 DECEMBER 2025

Permit Holder:

DAF – BIOSECURITY QLD CONTROL CENTRE
145 Wayne Goss Drive
BERRINBA QLD 4117

Persons who can use the product under this permit:

Persons generally

CONDITIONS OF USE

Products to be used:

SYNERGY PRO ANT BAIT (APVMA No. 67965)

PLUS OTHER REGISTERED PRODUCTS

Containing: 3.65 g/kg HYDRAMETHYLNON and 2.5 g/kg PYRIPROXYFEN as the only active constituents.

Warning:

Should not be used in areas accessible to children.

Directions for Use:

Situation	Pest	Rate
Domestic and public service areas, commercial and industrial areas, forests and non-crop areas (including gardens, golf courses, lawns, parks, turf, sports grounds, plant nurseries)	Red Imported Fire Ant <i>(Solenopsis invicta)</i>	2-4 kg/ha

Critical Use Comments:

- Comply with 'Directions for Use' for Red Imported Fire Ant on the product label.
- Apply using either handheld spreaders, spreaders attached to motor vehicles or aerial application.
- All spreading equipment should be calibrated on a regular basis to ensure that the permitted rate per hectare is achieved and not exceeded.
- Baits should be applied in the early spring or summer at the first sign of ant activity. Application is most effective when ants are actively foraging.
- Avoid application if rain is expected within 6 hours. DO NOT water treated areas for at least 24 hours after application.
- Very toxic to aquatic life. Refer to 'Protection of Wildlife, Fish, Crustaceans and Environment' statement on the product label.

Buffer zones for Ground application:

DO NOT apply within 8 m of waterways when using ground-based equipment

Buffer zones for aerial application:

Application rate	Aerial application equipment	Height of release	Mandatory downwind buffer zone for natural aquatic area
2-4 kg/ha	Fixed wing	50 ft/ 15m	30 m
	Helicopter	40 ft/ 12 m	30 m
	RPAS	22 ft/ 6.7 m	20 m

Withholding Period:

Livestock Grazing (except poultry): Not required when used as directed.

POULTRY -DO NOT graze treated turf or lawn or feed turf or lawn clippings from any treated area to poultry.

Jurisdiction:

QLD and NSW only.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

Issued by the Australian Pesticides and Veterinary Medicines Authority
