

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL PRODUCT
FOR CONTROL OF ABANDONED OR DISEASED DOMESTIC AND FERAL HONEYBEE
HIVES, NESTS AND SWARMS**

PERMIT NUMBER – PER88802

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 25 FEBRUARY 2020 TO 28 FEBRUARY 2025

Permit Holder:

PLANT HEALTH AUSTRALIA LIMITED
Level 1, 1 Phipps Close
DEAKIN ACT 2600

Persons who can use the product under this permit:

Persons who are trained and experienced in the use of agricultural chemicals working under the direction of State/Territory/Commonwealth Departments of Agriculture/Primary Industries.

CONDITIONS OF USE

Products to be used:

COOPEX INSECTICIDAL DUSTING POWDER INDUSTRIAL STRENGTH (APVMA No. 33210)

PLUS OTHER REGISTERED PRODUCTS

Containing: 10 g/kg PERMETHRIN (25:75 CIS:TRANS) as the only active constituent.

Directions for Use:

SITUATION	PURPOSE	Rate
Abandoned or diseased feral and domestic honeybee hives, nests and swarms	Euthanasia of feral and domestic honeybees	125 – 250 g product / nest/swarm
Nests or swarms of exotic pest bees	Destruction of nests or swarms	

Critical Use Comments:

- DO NOT treat hives where removal or sealing is not possible. Secondary poisoning by other bees robbing the hive may occur.
- It is not recommended for the product to be used in buildings unless the hive materials can be fully removed. Hive beetles are a potential secondary infestation issue, which can cause fouling/damage to the building.
- Apply one treatment inside the hive.
- Apply single dose of powdered product into the brood nest.
- Treat at night where possible, to avoid being stung. Operators should wear clothing protective against the insects including long sleeved overalls buttoned to the wrist and throat, gloves, hat and bee-veil.
- Ensure that, where possible, treated hives are removed and destroyed by fire.
- Where removal is not possible, all hive entries must be sealed to prevent access by other off target insects and animals.

Jurisdiction:

All States and Territories.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.
