- Apply to foliage by boom spray in sufficient water to achieve thorough coverage.

### Withholding Period:

Harvest: Do not harvest for 14 days after application.

Grazing: Do not graze or cut for stock food for 14 days after application.

### Jurisdiction:

All States and Territories.

### Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

### Export of treated produce

A Temporary Maximum Residue Limit (TMRL) and a Maximum Residue Limit (MRL) have been established to allow treated produce to be used for human and animal consumption. A TMRL has been established for dimethoate in pulses and a MRL for dimethoate in primary feed commodities for animals. MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.
