

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF FRUIT FLIES IN BLUEBERRIES**

PERMIT NUMBER – PER90027

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 9 OCTOBER 2020 TO 31 OCTOBER 2023

Permit Holder:

AUSTRALIA BLUEBERRY GROWERS ASSOCIATION
Wollongbar Primary Industries Institute
1243 Bruxner Highway
WOLLONGBAR NSW 2480

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

DOMINEX DUO INSECTICIDE (APVMA No. 53487)

PLUS OTHER REGISTERED PRODUCTS

Containing: 100 g/L ALPHA-CYPERMETHRIN as the only active constituent.

GENFARM ALPHA CYPERMETHRIN 250SC INSECTICIDE (APVMA No. 66977)

PLUS OTHER REGISTERED PRODUCTS

Containing: 250 g/L ALPHA-CYPERMETHRIN as the only active constituent.

RESTRAINT:

DO NOT apply if rainfall is expected within 6 hours of application.

Directions for Use:

Crop	Pest	Rate
Blueberries (field and protected)	Fruit flies (all species)	100 g/L products: 50 – 100 mL / 100 L
		250 g/L products: 20 – 40 mL / 100 L

Critical Use Comments:

- Apply a maximum of 6 foliar applications per season by airblast or equivalent with a minimum 7 day retreatment interval.
- DO NOT apply more than 2 consecutive applications before rotating with another insecticide with a different mode of action.
- For effective management of fruit fly this product may be required to be used as part of a broader strategic spray program involving other products approved for the control of fruit fly, in conjunction with appropriate pest monitoring. Efficacy of such spray programs may be dependent upon the significance and level of pest pressure during the season.
- Dangerous to bees: do not spray on any plants in flower while bees are foraging.
- Do not enter treated area until spray has dried.

Withholding Period:

Harvest: Do not harvest for 7 days after application.

Jurisdiction:

All States and Territories.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

To Avoid Crop Damage

The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.

Export of treated produce

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human consumption. An MRL has been established for cypermethrin in blueberries. MRLs can be found in the *Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.
