

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF POWDERY MILDEW IN NURSERY STOCK (NON-
FOOD)**

PERMIT NUMBER – PER90417

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 24 MAY 2021 TO 31 MAY 2024

Permit Holder:

GREENLIFE INDUSTRY AUSTRALIA LTD
c/o AGAWARE CONSULTING PTY LTD
21 Rosella Avenue
STRATHFIELDSAYE VIC 3551

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

ECOCARB FUNGICIDE (APVMA No. 58103)

PLUS OTHER REGISTERED PRODUCTS

Containing: 940 g/kg POTASSIUM BICARBONATE as the only active constituent.

Directions for Use:

Situation	Disease	Rate
Nursery stock (non-food): Seedlings, tubes & plugs, potted colour, trees and shrubs, foliage plants, palms, grasses, fruiting plants (non- bearing), cut flowers and ornamentals	Powdery Mildew	400 g/100 L + 200 mL/100 L vegetable oil adjuvant

Critical Use Comments:

- Nursery stock should be monitored for the first sign of powdery mildew.
- Apply a maximum of 6 sprays with a 10 day retreatment interval.
- Apply as foliar spray using ground-based sprayer (hydraulic, backpack or equivalent).
- Apply in sufficient water to ensure complete and thorough coverage of foliage and/or crop.
- Alternation with fungicides of other modes of action is critical for sustaining efficacy.
- DO NOT apply to plants that are suffering any environmental stress such as moisture stress or heat stress.
- DO NOT use on ferns and other highly sensitive plant species. Treat a small number of plants initially to ascertain their reaction before treating the whole crop.

Withholding Period:

Not required when used as directed.

Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

To Avoid Crop Damage

Potassium bicarbonate products have demonstrated phytotoxicity and undesirable commercial effects in some plant species. Flowering plants are known to react to highly alkaline sprays by changing colour of the bloom. This includes but is not limited to Azaleas and Hydrangeas.

Due to the large number of plant genera included under this permit the products have NOT been evaluated for crop safety on all species or in all situations where treatment may be undertaken. It is critical that a sample area be treated and assessed fully prior to whole crop treatment. This will help minimise potential for any undesirable effects. However, this action cannot guarantee crop safety as application method, environmental and crop conditions may vary from test treatment to whole of crop treatment. Any instances of phytotoxic effects should be reported to the permit holder and the APVMA.
