

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL  
PRODUCT FOR THE CONTROL OF SWARMING LEAF BEETLE  
IN SOYA BEANS AND MUNG BEANS**

**PERMIT NUMBER – PER90537**

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

**THIS PERMIT IS IN FORCE FROM 11 MAY 2021 TO 30 JUNE 2029**

**Permit Holder:**

GRAIN PRODUCERS AUSTRALIA  
12 Cooma Road  
BRAIDWOOD NSW 2622

**Persons who can use the product under this permit:**

Persons generally.

## CONDITIONS OF USE

### Product to be used:

STEWARD EC INSECTICIDE (APVMA No. 59573)

PLUS OTHER REGISTERED PRODUCTS

Containing: 150 g/L INDOXACARB as the only active constituent.

### Restrains:

Dangerous to bees. DO NOT apply when bees are actively foraging. Avoid direct application or drift of the spray mix onto beehives. After the spray has dried, bees can safely forage flowering crops.

### Directions for Use:

Crop	Pest	Rate
Soya beans Mung beans	Swarming leaf beetle ( <i>Rhyparida</i> spp.)	200 mL/ha

### Critical Use Comments:

- Apply when insects reach threshold levels.
- Apply to foliage using boom spray equipment. Ensure thorough coverage.
- DO NOT apply more than one (1) application per field for the entire growth cycle of the crop.
- DO NOT apply if rain is expected within 2 hours of application, or if heavy dew is present on crops.

### PROTECTION OF NON-TARGET BENEFICIAL INSECTS

Beneficial insects contribute to control of secondary pest outbreaks. Steward EC applications are unlikely to affect spiders and lacewings. Applications MAY temporarily reduce populations of predatory beetles, transverse ladybirds, ants and pirate bugs, but populations quickly recover.

### Jurisdiction:

QLD only.

### Withholding Periods:

Harvest: Do not harvest for 21 days after application.

Grazing: Do not graze or cut for stock food for 21 days after application.

### Livestock destined for export markets:

The above grazing withholding period only applies to stock slaughtered for the domestic market. Some export markets apply different standards. To meet these standards, ensure that the following Export Slaughter Interval is observed before stock are sold or slaughtered.

### Export slaughter interval (ESI):

Livestock that have been grazed on or fed treated crops and/or over-sprayed should be placed on clean feed for 28 days (4 weeks) prior to export slaughter.

### Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

Issued by the Australian Pesticides and Veterinary Medicines Authority.

Note: 13/06/2024 – Permit updated to new permit holder holder. Pest species clarified. Bee safety statement moved to restraints. S161 statement added. Permit expiry extended to 30 June 2029. Version 1 expired 31/05/2024. Permit issued as version 2 on 13/06/2024.
