Critical Use Comments:
- Regularly scout crops to monitor for eggs and larvae. Target sprays against eggs and newly hatched larvae (prior to third instar stage) before they become entrenched.
- Apply as a foliar application by ground-based boomspray or equivalent.
- Use a spray volume of 200 - 750 L/ha.
- DO NOT apply less than 7 days after the initial treatment.
- Use in accordance with the Resistance Warning statement on the product label.
- For use in IPM systems, refer to the Protections statements on the product label.

Withholding Period:
Not required when used as directed.

Jurisdiction:
All States and Territories, except VIC.
Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:
This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

To Avoid Crop Damage
The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.
