

Australian Government
**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF GRASS WEEDS IN GREEN BEANS**

PERMIT NUMBER – PER91492

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 13 JANUARY 2022 TO 28 FEBRUARY 2030

Permit Holder:

HORTICULTURE INNOVATION AUSTRALIA LTD
Level 7, 141 Walker Street
NORTH SYDNEY NSW 2060

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

STATUS HERBICIDE (APVMA NO. 61778)

PLUS OTHER REGISTERED PRODUCTS

Containing: 240 g/L CLETHODIM as the only active constituent.

SELECT XTRA HERBICIDE (APVMA No. 65513)

PLUS OTHER REGISTERED PRODUCTS

Containing: 360 g/L CLETHODIM as the only active constituent.

RESTRAINTS:

DO NOT apply without the addition of an adjuvant.

DO NOT apply to plants that are stressed by moisture or temperature extremes.

DO NOT apply if rain is expected within one hour of application.

DO NOT apply more than one application per crop

SPRAY DRIFT RESTRAINTS:

Specific definitions for terms used in this section can be found at apvma.gov.au/spraydrift.

DO NOT allow bystanders to come into contact with the spray cloud.

DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift. Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.

DO NOT apply unless the wind speed is between 3 and 20 kilometres per hour at the application site during the time of application.

DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings 1 to 2 hours before sunset and persist until 1 to 2 hours after sunrise.

Directions for Use:

Crop	Pest	Rate
Green beans	Annual grasses as per registered product label 2-5 leaf stage	240 g/L clethodim products: 250 - 375 mL/ha Plus crop oil (at label rates) 360 g/L clethodim products: 165 – 250 mL/ha Plus crop oil (at label rates)
	Annual grasses as per registered product label 5-leaf to fully tillered	240 g/L clethodim products: 375 - 500 mL/ha Plus crop oil (at label rates) 360 g/L clethodim products: 250 - 330 mL/ha Plus crop oil (at label rates)

Critical Use Comments:

- Apply at post-emergence of grass weeds when weeds are at least 2-leaf to fully tillered stages.
- Apply a maximum of one (1) foliar spray treatment per crop using calibrated boom sprayer or similar equipment.
- Apply in a minimum volume of 50 L water per hectare. Use 150 L water per hectare when spraying dense grass weed infestations.
- Always apply with D-C-TRATE at 2 L/100 L or HASTEN at 1 L/100 L or UPTAKE at 500 mL/100 L spray volume.

Withholding Period:

Harvest: DO NOT harvest crops for 4 weeks after application.

Grazing: DO NOT graze or cut for stock food for 4 weeks after application.

Jurisdiction:

All States and Territories, except VIC.

Note: Victoria is not included in this permit, as their Control-of-Use legislation means a permit is not required to legalise this off-label use in that State.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the Agricultural and Veterinary Chemicals Code Act 1994, in accordance with the obligation imposed by that section.

Export of treated produce

Temporary Maximum Residue Limits (TMRLs) have been established to allow treated produce to be used for human and animal consumption. A TMRL has been established for Sethoxydim in Beans, except broad bean and soya bean and in Legume animal feeds (except Peanut fodder and Peanut forage (green)). MRLs can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

18/02/2025 – Permit updated to add spray drift restraints and s161 statement. PER91492 expired 31/01/2025. Permit version 2 issued 18/02/2025.
