Protection of Wildlife, Fish, Crustaceans and Environment

Very toxic to aquatic life. DO NOT contaminate wetlands or watercourses with this product or used containers.

DO NOT feed treated seed or otherwise expose to wild or domestic birds/mammals. Any spillages of treated seed, however minor, must be cleaned up immediately, preferably by recovery and re-use. If disposal is required, ensure treated seeds are thoroughly buried and not accessible to birds and other wildlife.

Disposal

Spent dips: Prior to disposal, deactivate the spent dip with bentonite clay or clay soil at a minimum ratio of 15 kg bentonite clay or clay soil per 100L. Dispose of flocculate DDAC/bentonite clay by evenly spreading over flat land in a disposal site dedicated for spent dips that is adequately bunded with soil to at least 15 cm high. Do not exceed the standard spent dip rate of 20,000 L/ha.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

To Avoid Crop Damage

The sensitivity of the crop to be treated under this permit has not been fully evaluated. It is advisable to only treat a small area to ascertain the reaction before treating the whole crop.
