

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF AQUATIC WEEDS IN ENCLOSED WATER BODIES**

PERMIT NUMBER – PER92971

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 24 MARCH 2023 TO 31 MARCH 2028

Permit Holder:

PORT MACQUARIE HASTINGS COUNCIL
Cnr Lord and Burrawan St
PORT MACQUARIE NSW 2444

Persons who can use the product under this permit:

Persons who are trained and experienced in application of chemicals in aquatic and terrestrial environments and directed by the Local Control Authority Weeds Officer or a Regional Weeds Committee.

CONDITIONS OF USE

Products to be used:

LYNX WG HERBICIDE (APVMA No. 59851)
PLUS OTHER REGISTERED PRODUCTS
Containing: 600 g/kg METSULFURON-METHYL as the only active constituent.

RESTRAINT:

DO NOT spray or flush equipment near non-target trees or on areas where their roots may extend or in locations where the chemical may be washed or moved into contact with their roots.
DO NOT store a spray mix of metsulfuron-methyl for more than 2 days
DO NOT use treated water for irrigation.
DO NOT spray if rainfall or elevated water flow are expected within 4 hours of application.
DO NOT broadcast spray over the water or allow spray to drift onto non-target areas.
DO NOT use surfactants/wetters that are not registered for use in aquatic situations.

Directions for Use:

Situation	Pest	Rate
<p>Enclosed water bodies (e.g. dams, naturally occurring water holes, wetland pools and stationary bodies of water)</p> <p>Areas within 400 m of potable water supply uptakes are excluded.</p>	<p>Salvinia (<i>Salvinia molesta</i>)</p> <p>Water lettuce (<i>Pistia stratiotes</i>)</p> <p>Water hyacinth (<i>Eichornia crassipes</i>)</p> <p>Water stargrass (<i>Heteranthera zosterifolia</i>)</p> <p>Frogbit (<i>Limnobium laevigatum</i>)</p> <p>Kidney leaf mud plantain (<i>Heteranthera reniformis</i>)</p> <p>Parrot's feather (<i>Myriophyllum aquaticum</i>)</p>	<p>10 g / 100 L</p> <p>Add wetter at 200 mL / 100 L</p>

Critical Use Comments:**WARNING: VERY TOXIC TO AQUATIC PLANTS AND ALGAE**

- ONLY apply as a foliar spot spray during non-frost periods using a high volume sprayer/knapsack fitted with calibrated spray equipment.
- Spray from a point easily accessible to the target weed occurrence and minimise overspray into the water surrounding the target weed mat.
- Agitate spray mix constantly during spraying.
- Ensure spraying equipment is well maintained, adjusted and does not leak.
- Stop spraying before the herbicide droplets on the leaves begin to coalesce and run off.
- DO NOT apply more than 3 applications per year.
- DO NOT apply less than 90 days after the previous treatment.
- Treatment may result in severe oxygen depletion, which would have an adverse effect on aquatic wildlife. Care should be exercised and, where possible, mitigation measures implemented when treating enclosed water bodies that are more than 50% covered by weed or in climatic conditions which contribute to low dissolved oxygen levels.

Jurisdiction:

NSW only.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.
