**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF SOYBEAN STEM FLY IN SOYBEAN**

PERMIT NUMBER – PER93288

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 15 MARCH 2023 TO 31 MARCH 2028

Permit Holder:

PULSE AUSTRALIA LIMITED
Suite 501, Level 5 6 Help Street
CHATSWOOD NSW 2067

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

ADAMA DIMETHOATE 400 INSECTICIDE (APVMA No. 39239)

PLUS OTHER REGISTERED PRODUCTS

Containing: 400 g/L DIMETHOATE as the only active constituent.

RESTRAINT:

DO NOT use to control pests that are resistant to organophosphorus insecticides as treatment may be ineffective.

DO NOT apply by misting or fogging equipment

DO NOT apply with airblast spray equipment

DO NOT use open mixing/loading systems for aerial application

SPRAY DRIFT RESTRAINT

Specific definitions for terms used in this section can be found at apvma.gov.au/spraydrift

DO NOT allow bystanders to come into contact with the spray cloud.

DO NOT apply in a manner that may cause an unacceptable impact to native vegetation, agricultural crops, landscaped gardens and aquaculture production, or cause contamination of plant or livestock commodities, outside the application site from spray drift. Wherever possible, correctly use application equipment designed to reduce spray drift and apply when the wind direction is away from these sensitive areas.

DO NOT apply unless the wind speed is between 3 and 20 kilometres per hour at the application site during the time of application.

DO NOT apply if there are hazardous surface temperature inversion conditions present at the application site during the time of application. Surface temperature inversion conditions exist most evenings one to two hours before sunset and persist until one to two hours after sunrise.

Directions for Use:

Crop	Pest	Rate
Soybean	Soybean stem fly (<i>Melanagromyza sojae</i>)	75 mL/100 L water or up to 800 mL/ha

Critical Use Comments:

- Apply when pests appear.
- Apply foliar application by boom spray.
- Use a spray volume of 50-100 L/ha.
- DO NOT apply more than 3 applications per crop.
- DO NOT apply less than 14 days after the previous treatment.

Withholding Period:

Harvest: Do not harvest for 14 days after application.

Grazing: Do not graze or cut for stock food for 14 days after application.

Protection of Livestock

Dangerous to bees. DO NOT spray any plants in flower while bees are actively foraging.

Jurisdiction:

NSW and Qld only.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.

Export of treated produce

Maximum Residue Limits (MRLs) have been established to allow treated produce to be used for human and/or animal consumption. An MRL has been established for Dimethoate in Pulses. MRLs can be found in the *Agricultural and Veterinary Chemicals (MRL Standard for Residues of Chemical Products) Instrument 2023*. MRLs apply only to produce marketed and consumed in Australia. If treated produce is to be exported, residues must not exceed the limits/tolerances of the importing country.

Issued by the Australian Pesticides and Veterinary Medicines Authority

Note: 27/04/2025 – Permit updated to change type to minor use permit. Restraints and critical use comments updated. Permit expiry extended to 31/3/2028. Permit issued as Version 2.
