

PERMIT TO ALLOW EMERGENCY USE OF A REGISTERED AGVET CHEMICAL

PRODUCT FOR CONTROL OF QUARANTINE PESTS INCLUDING POLYPHAGOUS SHOT HOLE BORER IN HIGH VALUE TREES AND SHRUBS

PERMIT NUMBER – PER93427

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 27 MARCH 2023 TO 31 MARCH 2025

Permit Holder:

DEPARTMENT OF PRIMARY INDUSTRIES & REGIONAL DEVELOPMENT 3 Baron-Hay Court SOUTH PERTH WA 6151

Persons who can use the product under this permit:

Staff, contractors and licensed pest management technicians employed by or under the supervision of the WA Department of Primary Industries and Regional Development.

PER93427 Version 1 Page 1 of 2

CONDITIONS OF USE

Products to be used:

EMA-JECT RTU TREE INJECTABLE INSECTICIDE (APVMA No. 88692) PLUS OTHER REGISTERED PRODUCTS

Containing: 15 g/L EMAMECTIN BENZOATE as the only active constituent.

RESTRAINT:

DO NOT apply to trees or shrubs producing fruit for human or animal consumption.

Directions for Use:

Situation	Pest	Rate
High value trees and shrubs	Quarantine pests including Polyphagous Shot Hole Borer (Euwallacea spp.)	Stem Injection
		2.6 – 5 mL per hole with 20 cm spacing between holes
		3.3 – 6.3 mL per hole with 25 cm spacing between holes
		Application directly into borer shot holes
		DO not exceed 11.78 mg active ingredient per cm of DBH (diameter at breast height)

Critical Use Comments:

- Use tree injection devices to apply the chemical.
- Tree injection in holes should be spaced 20-25cm apart, or directly into borer shot holes until shot hole is at capacity at a rate not to exceed the total dosage allowed for the tree circumference.
- Use higher rate when pest infestation is high.
- Avoid application beneath areas of rot, wounding or other areas where vertical systemic uptake may be blocked within the tree.
- Where possible, inject directly in line beneath branches or limbs.
- DO NOT apply more than 1 application per year.
- See General Instructions on product label for further information on application methods.

Jurisdiction:

WA only. Specific locations determined by the Chief Plant Biosecurity Officer, Department of Primary Industries and Regional Development WA.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

The holder of the permit must notify the APVMA of new information, including relevant information in accordance with section 161 of the Schedule to the *Agricultural and Veterinary Chemicals Code Act 1994*, in accordance with the obligation imposed by that section.
